PROFESSIONAL SUMMARY

AWS Certified Solutions Architect – Associate (89%) and AWS Cloud Practitioner (100%) with hands-on experience building serverless AWS architectures using Lambda, API Gateway, DynamoDB, Cognito, CloudFormation, CloudFront, CloudWatch, and IAM. Designed and deployed a production-ready serverless journal application with CI/CD pipeline integration on GitHub. Familiar with Python scripting and Linux command-line operations. Following a deliberate career transition from 2+ years of IT operations experience, actively seeking an entry-level cloud support, technical support, or IT support role to apply and grow AWS expertise. Immediately available and open to all locations across India.

CERTIFICATIONS

- AWS Solutions Architect – Associate (SAA-C03) — Score: 89%
Credential: [credly.com/users/ragunathan-k.c90e4ac4](https://www.credly.com/users/ragunathan-k.c90e4ac4)
- AWS Cloud Practitioner (CLF-C02) — Score: 100%
- Honors Diploma in Computer Applications (HDCA) — CSC, 2019–2020

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services (AWS)

AWS Services: EC2, S3, Lambda, API Gateway, DynamoDB, Amazon Cognito, CloudFront, CloudFormation, CloudWatch, SNS, IAM, VPC, RDS, CloudTrail

Infrastructure as Code: AWS CloudFormation (IaC)

Programming & Scripting: Python (fundamentals, OOP, file handling, boto3 — S3 operations, file upload automation), AWS CLI (basic commands)

Operating Systems: Linux (file system, user permissions, package management), Windows

Security: IAM Least Privilege, TLS 1.3, Cognito Authentication, HTTPS enforcement

Monitoring & Alerting: CloudWatch Dashboards, CloudWatch Alarms, SNS Email Alerts

Other: Database Management, IT Operations, Workflow Automation, Documentation, Troubleshooting, Customer Service, Remote Support, Problem Solving, Communication Skills

CI/CD: GitHub Actions (basic pipeline, automated S3 deployment)

PROJECTS

Serverless Journal Web App — AWS Cloud Architecture

Personal Project

GitHub: <https://github.com/Ragunathan2305/journal-app-aws> | AWS Region: ap-south-1 (Mumbai)

Stack: S3, CloudFront, API Gateway, Lambda, DynamoDB, Cognito, CloudWatch, SNS, CloudFormation, IAM

- Designed and deployed a secure serverless journal app with Lambda, API Gateway, and DynamoDB, eliminating EC2 costs and enabling on-demand scalability.
- Implemented user authentication and access control using Amazon Cognito (hosted UI) with self-registration disabled for enhanced security
- Built REST API using API Gateway + Lambda (Python) + DynamoDB, applying least privilege IAM policies across all services to enforce zero-trust security
- Hosted frontend on S3 and distributed via CloudFront with HTTPS and TLS 1.3 enforcement for secure global content delivery
- Configured CloudWatch dashboard to monitor Lambda invocations, error rates, and duration; set up SNS email alerts for Lambda error events

- Generated a complete CloudFormation IaC template for full infrastructure backup, reproducibility, and portability across environments
- Selected Mumbai region (ap-south-1) strategically for low latency; chose serverless over EC2 for cost efficiency and zero server management
- Implemented CI/CD pipeline using GitHub Actions to automate deployment of frontend to S3 on every code push

Personal Portfolio Website — AWS Static Hosting

Stack: HTML, CSS, JavaScript, AWS S3, CloudFront

- Developed and deployed a static portfolio website using HTML, CSS, and JavaScript, hosted on AWS S3 and distributed via CloudFront for secure HTTPS global access
- Configured S3 bucket policies to disable direct public access, enforcing all traffic through CloudFront with HTTPS for enhanced security and performance

PROFESSIONAL EXPERIENCE

Operations Support Associate

April 2023 – December 2025

Sri Sai Fusion Techno Works — Chennai, Tamil Nadu | Full-time

- Coordinated a 20-member team, streamlining workflows and resource allocation, increasing productivity by 12%
- Directed daily data entry and reporting operations, achieving 11% improvement in accuracy and consistency
- Created monthly performance reports and forecasts, reducing reporting delays by 10% and supporting senior-level planning
- Oversaw task assignment and cross-team coordination, reducing task completion delays by 9%
- Maintained documentation, invoicing, and compliance records, improving communication accuracy by 8%
- Monitored team performance metrics applying tracking techniques transferable to IT operations monitoring, boosting operational reliability by 7%

Graduate Engineer Trainee – IT Systems (NATS)

January 2024 – January 2025

Tamil Nadu State Transport Corporation (Villupuram) Limited (TNSTC) — Kanchipuram, Tamil Nadu | Full-time (concurrent with above role) | NATS Certified

- Administered and updated government database systems for passenger records and route modifications, improving data accuracy by 15%
- Maintained daily operational datasets (collections, consumption, departmental activities) across subsystems, improving accuracy by 12%
- Coordinated with multiple departments to ensure data integration into centralized IT systems, enhancing workflow efficiency by 8%
- Supported authentication and database management processes in government IT systems, reducing inconsistencies by 7%
- Generated monthly performance and financial reports, streamlining planning cycles and cutting reporting delays by 10%

EDUCATION

B.E. in Mechanical Engineering

August 2019 – April 2023

Sri Sairam Engineering College — Tambaram, Chennai, Tamil Nadu

CGPA: 8.2 / 10

AWS | Cloud Infrastructure | Serverless | Python | Boto3 | Lambda | S3 | DynamoDB | CloudFormation | CloudFront | Cognito | IAM | EC2 | DevOps | IT Support | Linux | Database Management | CI/CD | Technical Support | Troubleshooting | Service Desk | Remote Support | Windows | Customer Service
